PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/516,709	Applicant(s) NORIAKI OKAMURA	
	Examiner Masud Ahmed	Art Unit 3714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 October 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) 6 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 04 December 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The examiner has considered the Information Disclosure Statement submitted by the applicant on 04/08/2005 (corrected date).

Claim Status/Remarks

Claims 1-5 and 7-9 are pending on this application. The examiner has acknowledged the error with inventor Bib data sheet and recognized **Noriaki Okamura** as the sole inventor of this application. Examiner will notify the appropriate administrative personnel to correct the error on Bib Data Sheet along with removing incorrect declaration that was scanned into the system by error.

Response to Amendment

The applicant has cancelled claim 6 and amended claims 1-3 and 8. The examiner has considered the amendment very carefully.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kazuyoshi et al (JP2002-066141), in view of James et al (US 6,179,713).

Regarding claims 1 and 8, Kazuyoshi discloses a gaming machine that is connected in a public network having capability of sending and receiving emails from each individual player, thus each player are identified by their email addresses (para

0031, lines 1-3, Fig 2, 11 and para 0033, lines 1-5). Kazuyoshi further discloses email sentences get analyzed to obtain instruction information for the game (para 0035, lines 1-5); and the text information get judged or evaluated for the status of the game, thus the state of the game progress can be determined (para 0035, lines 5-9). Kazuyoshi also teaches reply back to the player with the updated information and the status of the game story (para 0040, lines 4-7), and it is understood that players are identified by the sent emails to the game machine and replies are sent to those emails as well. Even though it is well known in the art, when a device updates a status of any data it has to compare the updating data to a stored data, Kazuyoshi teaches the game text analysis and the evaluation that can be interpreted as evaluating story in a game or the progress state of the game for the player. Kazuyoshi teaches a gaming device that has a pre-determined command stored on the game server, which are compared with player text command to progress the game. However Kazuyoshi fails to teach various types of information such as words being distributed in a public network and being available to the players via a homepage. James teaches a command based multiplayer network game that distributes various types of player information through a public network and available to the players (col 3, lines 65-66 and col 4, lines 1-8), and having the information available via a homepage would have been obvious to ordinary skilled artisan. Therefore it would have been obvious for one having ordinary skill in the art to modify Kazuyoshi's web server based information to include James web player information available to the players via homepage to create more excitement in the game.

Regarding claim 2, Kazuyoshi teaches a gaming machine that has pre-determined stored words (Fig 2, 23) where the words get analyzed from the content of the email (para 0036, lines 1-30).

Regarding claim 3, Kazuyoshi teaches a gaming device having capability of sending and receiving emails, where based on the email content comparing with pre-determined server based data, a state or story of a game is determined. If a player sent text does not match with the pre-determined content on the server, which would not apply as a command or direction for the game, which would cause an error. However, Kazuyoshi failed to disclose an error message being sent to the player when an error occurs. James teaches a command base network multiplayer game having a validity function of checking the command for an error and send the error message to the player (col 9, lines 1-10) Therefore it would have been obvious for one having ordinary skill in the art to understand that unmatched text would cause an error and player would be notified in order to further progress in the game and incorporate James into Kazuyoshi to have error handling email message.

Regarding claim 4, Kazuyoshi teaches a gaming device having email functionality and a pre-determined text or object-based game. However Kazuyoshi fails to specifically disclose computing the time in between the email messages or the commands. James teaches a command base network multiplayer game that has pre-determined text and the player time is computed to determine the state of the game progress (col 10, lines 35-55). Therefore it would have been obvious for one skilled in the art to modify Kazuyoshi's software to compute time in between game states.

Regarding claim 5, Kazuyoshi discloses a gaming device having pre-determined image data that can be attached to the development of the game state or story (para 0040, lines 1-5).

Regarding claim 9, Kazuyoshi teaches a gaming device where the device is a mobile phone (para 0026, line 3 and Drawing 1).

Response to Arguments

3. Applicant's arguments with respect to claims 1-3 and 8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
